

Alternative AI Training Data Privacy Policy

Policy ID: AI-DP-PII-002 **Version:** 1.0 **Classification:** Internal

Purpose: Test document containing a different set of PII, SPII and CPII rules for the Policy-as-Code extraction pipeline.

1. Decision Definitions

PASS: No PII, SPII or CPII is detected.

FLAG: Personal data is detected and the record requires remediation before permitted use.

BLOCK: Sensitive or high-risk personal data is detected and the record must be excluded unless an approved exception exists.

2. PII Rules

Rule ID	Data Type	Trigger / Fields	Outcome
PII-101	Username / account handle	username, account_handle, screen_name	FLAG
PII-102	Date of birth	date_of_birth, dob, birth_date	FLAG
PII-103	Personal URL	personal_website, profile_url linked to an individual	FLAG
PII-104	Vehicle registration number	vehicle_registration, registration_plate	FLAG
PII-105	Geolocation information	precise_location, GPS coordinates linked to an individual	FLAG
PII-106	Emergency contact details	emergency_contact_name, emergency_contact_phone	FLAG
PII-107	Tax identification number	tax_id, taxpayer_number	BLOCK
PII-108	Travel document reference	passport_reference, travel_document_id	BLOCK

3. SPII Rules

Rule ID	Data Type	Trigger / Fields	Outcome
SPII-101	Mental health information	mental_health_status, psychiatric_history, therapy_record	BLOCK
SPII-102	Sexual orientation	sexual_orientation, orientation	BLOCK
SPII-103	Criminal record information	criminal_record, conviction, alleged_offence	BLOCK
SPII-104	Financial hardship information	debt_status, insolvency, financial_hardship	BLOCK
SPII-105	Immigration status	visa_status, immigration_status, asylum_status	BLOCK
SPII-106	Religious practice details	worship_attendance, religious_practice, faith_activity	BLOCK
SPII-107	Disability accommodation information	reasonable_adjustment, accommodation_need	BLOCK

4. CPII Rules

Rule ID	Combination	Trigger	Outcome
CPII-101	Name + employer + job title	full_name + employer + job_title	FLAG
CPII-102	Date of birth + city + gender	dob + city + gender	FLAG
CPII-103	Username + email domain + organisation	username + email_domain + organisation	FLAG
CPII-104	Vehicle registration + postcode	registration_plate + postcode	FLAG
CPII-105	Employee number + manager + work location	employee_number + manager_name + work_location	FLAG
CPII-106	Customer reference + transaction timestamp + merchant	customer_reference + transaction_time + merchant_name	FLAG

Rule ID	Combination	Trigger	Outcome
CPII-107	Free text containing multiple indirect identifiers	free_text containing two or more linkable personal attributes	FLAG
CPII-108	Location history + device identifier	location_history + device_id	FLAG

5. Remediation Requirements

For FLAG records, permitted remediation methods include removal, masking, tokenisation, generalisation, pseudonymisation, or anonymisation, as appropriate to the data.

For BLOCK records, the personal data must be removed or transformed sufficiently before use. An approved exception may permit controlled use where explicitly authorised.

For PASS records, no remediation is required.

6. Testing Notes

This document intentionally uses different rule IDs and data types from the original policy. It is designed to test whether the extraction pipeline detects new rules, categories, combinations, decisions and remediation guidance rather than relying on hardcoded rules.
